

People have a right not to be harrassed with unwanted phone calls. If people want to buy a product or service they will contact them.(companies) They can advertise on internet where people can find them. No one wants to be bothered with junk mail or phone calls these days. I am deaf and when the TTY goes off and I am woke up or disturbed because of a voice caller that can't leave a message or communicate thru relay as instructed it is really upsetting. Since I signed up for DO NOT CALL LIST my calls have been greatly reduced to maybe 1 or 2 a month from random dialers.
